

Use of AI against Taxcrime

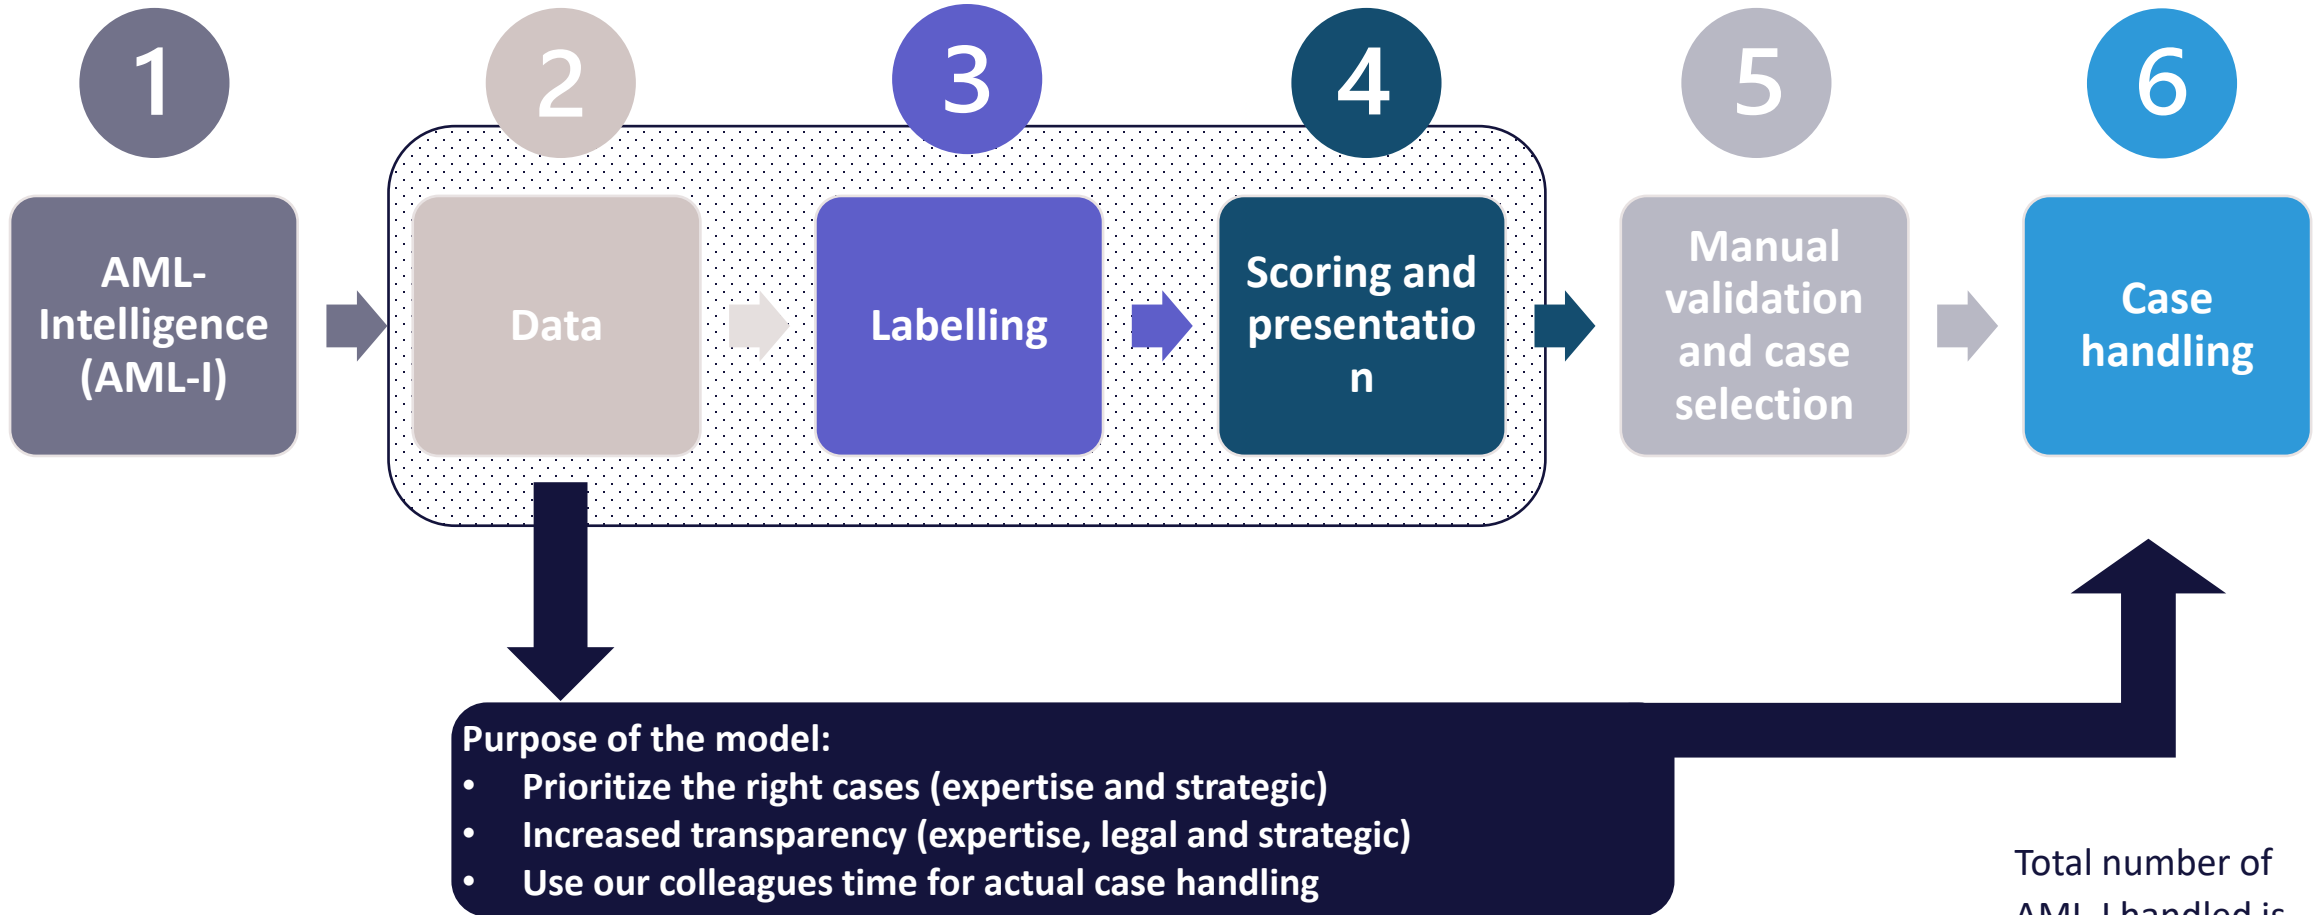

The AML Prioritization model

Prioritization is nothing new (Process before the model)

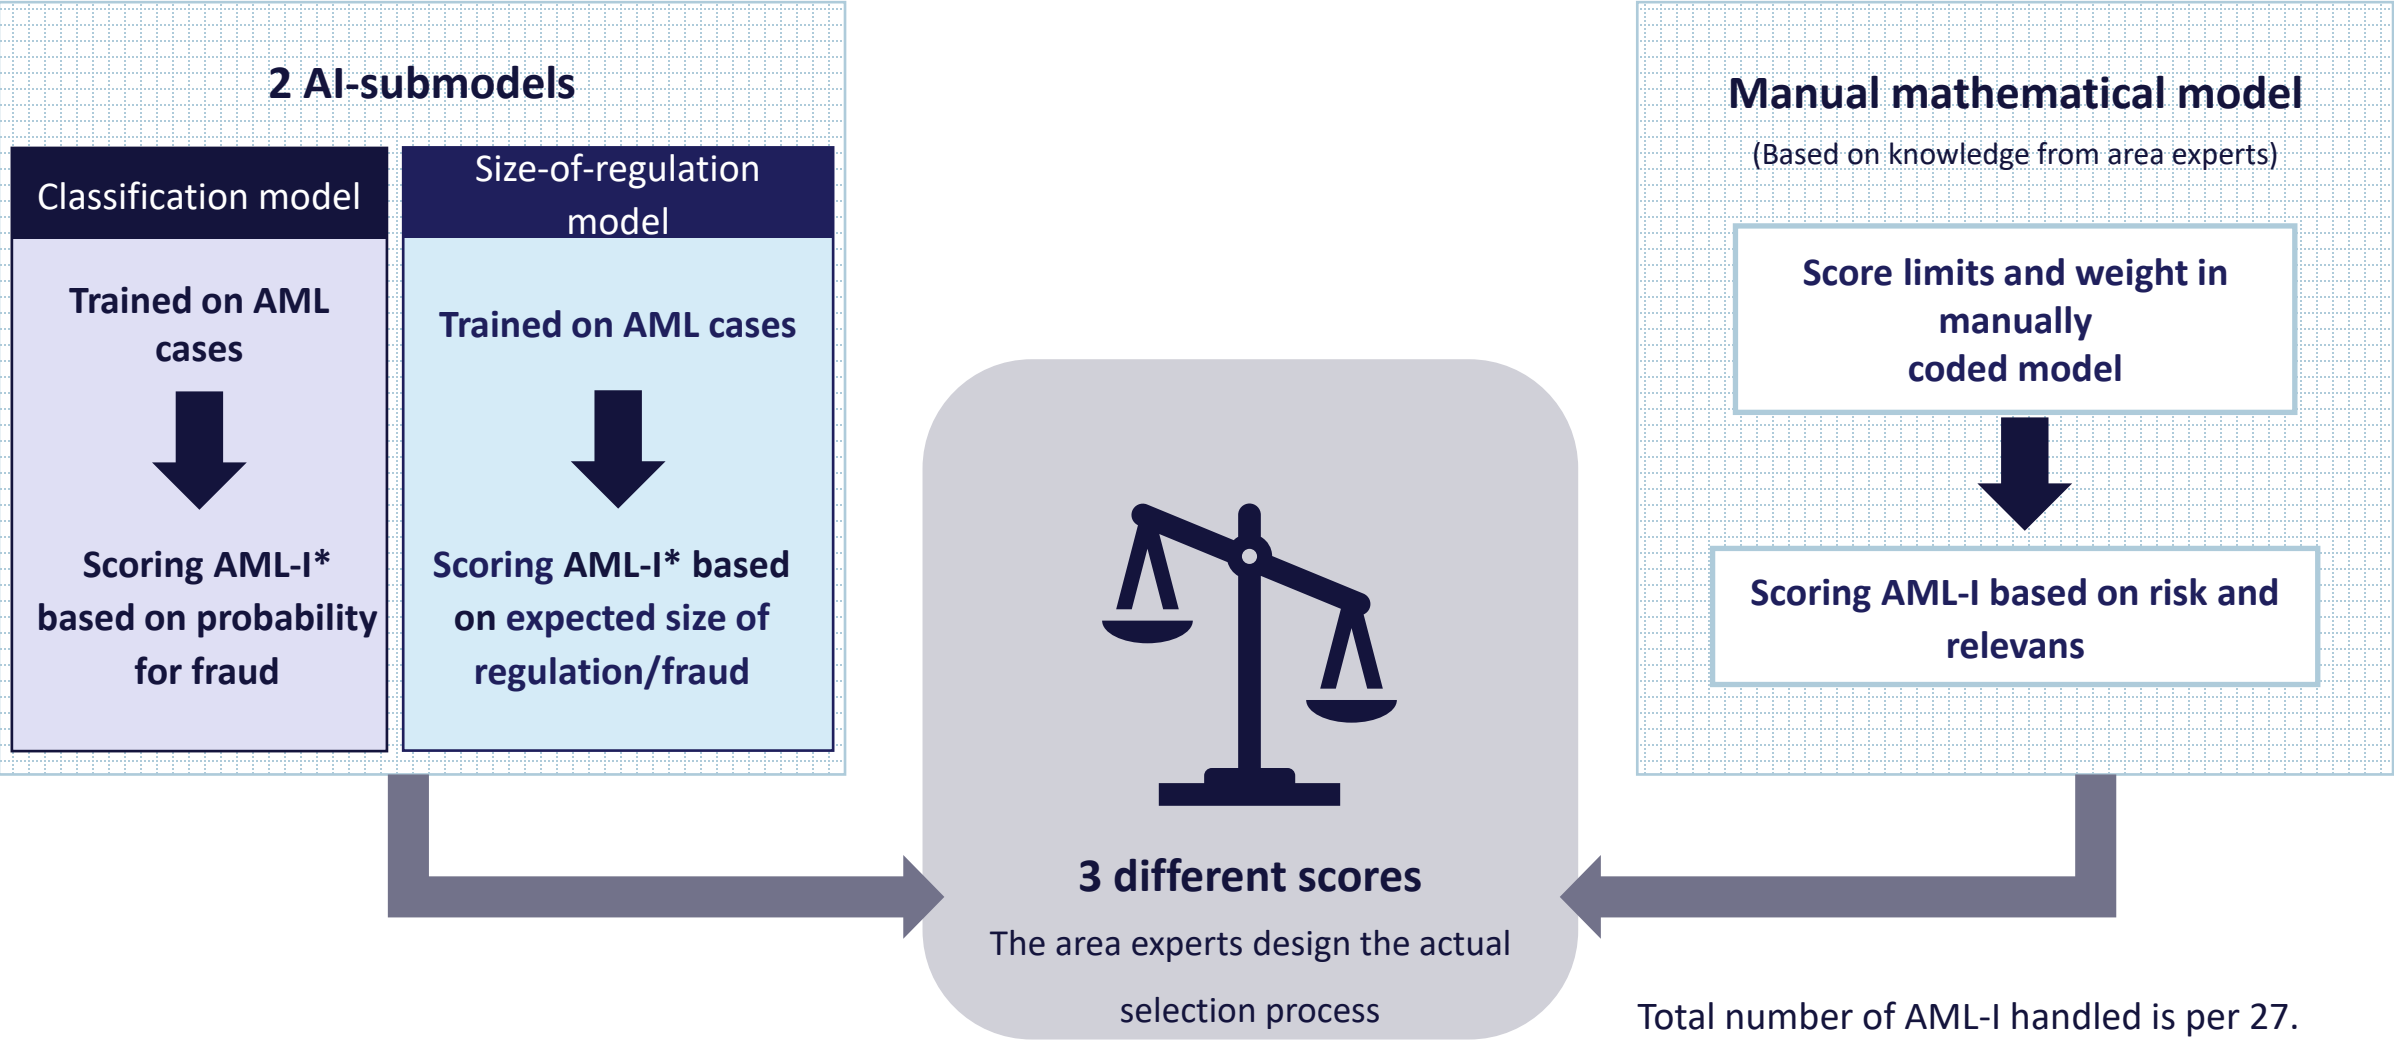

Proces after introducing the model

Total number of
AML-I handled is
per . 27 November
2025 = 28,233

How is the model built?

*AML-I is short for AML-Intelligence

Total number of AML-I handled is per 27.
November 2025 = 28,233

Considerations regarding compliance and use of data

Responsibility assesment of the departement
