FR

2.50

2.50FR

1: E-government requires login solutions

2: Most logins are about recognition — not identity

3: Federalism creates innovation — and fragmentation

**4: A single login for all authorities
was not legally possible**

5: The EMBAG Act made AGOV possible in 2024

**6: AGOV brings together legal,
political and practical needs**

7: The e-ID is not a login — but becomes one

Please do not confuse the Swiss e-ID
with the private login provider SwissID

8: AGOV integrates e-ID without changing applications

9: Even strong identity has its limits

10: Digital identity evolves — and sovereignty remains a challenge
